ABOUT ME

Undergraduate data science student at Paris Sciences et Lettres—PSL University—with a strong interest in Natural Language Processing, OCR, ASR, as well as their application to sociology, archaeology, geopolitics or cultural studies. I aim to specialize in quantitative modeling and analysis of low-resource languages and Arabic dialects, while remaining open to new experiences...

EDUCATION

Bachelor – CPES Data Science, Arts & Cultures <i>PSL University & Lycée Louis-Le-Grand (Paris, France)</i> Selective, multi-disciplinary curriculum in Mathematics, Data Science, Algorithmics, and Cultural Sciences.	2024 – now
Classes Préparatoires aux Grandes Écoles (CPGE) – MP2I <i>Lycée Hoche (Versailles, France)</i> Highly selective French program preparing for competitive entrance exams for engineering and research schools in Mathematics, Physics, and Computer Science.	2023 – 2024
Baccalaureate – Mathematics and Physics <i>Lycée Marie Curie (Sceaux, France)</i> Graduated with Highest Honors.	2022 – 2023

EXPERIENCES & INTERNSHIPS

Quantitative Life Sciences Section Research Intern <i>SISSA & ICTP, Trieste, Italy</i> Six-month research internship in Prof. Matteo Marsili’s group, on the mathematical and information-theoretic foundations of neural networks representations; exact project scope still being finalized. Supervisor: Prof. Matteo Marsili	2026 – 2027 <i>expected</i>
EELISA Summer School “Archaeology & Architecture” <i>Scuola Normale di Pisa, Agrigento, Italy</i> One month program on archaeological excavation, architectural documentation, and 3D/VR modeling of ancient sites, at the UNESCO World Heritage site of the Valle dei Templi; extended my previous work on manuscript data toward spatial data.	Sept. 2026 <i>expected</i>
PROCLAC Lab Research Intern <i>Collège de France, EPHE & CNRS</i> Optimizing pipelines for 15th-century Arabic and Aljamiado manuscripts collection, segmentation and digitization. I used eScriptorium, Python, XML, TEI and HTR methods, such as Kranen models. Supervisors: Dr. Riham Mokrani & Prof. Nurilla de Castilla	2025 – 2026

CONFERENCES & WORKSHOPS

EELISA Digital Philology Workshop: Methods, Tools, and Infrastructures <i>Scuola Normale di Pisa, Italy</i> Five-day to explore current innovations in digital philology through a combination of lectures, practical workshops, and collaborative discussion.	July 2026
---	-----------

INVOLVEMENTS

Al-Adab Association Member Promoting Arab cultures and dialogue through films, debates, and student events.	2026 – now
CPES Student Union Elected Representative <i>PSL University</i> Coordinating team efforts, planning student events, and mentoring first-year students.	2025 – 2026
Carthago Nostrum Association Member Promoting Tunisian culture and debates. Editing video content, including interviews with historians and journalists (e.g., Sophie Bessis).	2019 – 2023
High School Tutoring <i>Lycée Marie-Curie (Sceaux, France)</i> Providing support in mathematics, physics, and informatics to other high school students.	2022 – 2023

¹ Optical Character Recognition ² Automatic Speech Recognition ³ Text Encoding Initiative ⁴ Handwritten Text Recognition

SKILLS

- **Mathematics:** Second-year undergraduate level, with a solid grasp of core tools in analysis and algebra.
- **Data Science:** Able to apply standard models using scikit-learn, including logistic, ridge, and multivariate regression, neural networks, and basic NLP embedding models.
- **Programming:** Proficiency in Python. Basic skills in C, OCaml, and L^AT_EX.
- **Physics:** Knowledge in physics and industrial science (CPGE level).
- **Languages:** French (native), Tunisian Arabic (native), English (C1), Classical Arabic (A2), Italian (A1).
- **Additional Languages:** Basic knowledge of Russian and German (studied during high school), Basic knowledge of Latin and Ancient Greek (2 years during middle school).

HOBBIES

- **Music:** Self-taught Ney and Oud. Oboe at conservatory. 3rd cycle music theory with highest honors. Composition on MuseScore.
- **Sports:** Road cycling in a club.
